

**AMENDMENTS TO THE ABSTRACT**

Please replace the Abstract with the new Abstract below. Deletions appear in strikethrough font, and additions are underlined.

~~The present invention refers to~~ A thermoplastic multilayer composite (4) in the form of a hollow body which is formed by at least one inner layer (1) on the basis of polyamides, at least one ~~inter-mediate~~ intermediate layer (2) as well as at least one thermoplastic outer layer (3). Furthermore, ~~the present invention relates to a process for making such a thermoplastic multilayer composite as well as to the use of such a thermoplastic multilayer composite as a tubing, in particular for fuels. In particular in the context of the use as a tubing for fuels the~~ The proposed multilayer structure shows to ~~be surprisingly~~ is resistant against petrol comprising peroxide while at the same time having a simple structure, ~~if the inner layer (1) is based on a mixture of different polyamide homopolymers, and if the inner layer (1) additionally comprises a compatibilizer.~~
